

Omnino Pro

Delivering performance and manageability
in an elegant all-in-one form factor

OMNINO

Viglen Personal Computers are
manufactured by XMA in the UK

Omnino Pro

The Viglen Omnino Pro is the next-generation all-in-one PC from XMA for users who demand power and style for every desk. Combining the best features of previous all-in-one models from the Viglen range and enhancing performance, elegance and connectivity, the Omnino Pro is a versatile platform which is equally suited to office, classroom and hotdesk environments.

Performance

Unlike other all-in-one PCs which use power-limited processors, the Viglen Omnino is based on proven technology from Viglen and Intel and benefits from the power of Intel® Core™ processors. The result is a scalable PC which fits seamlessly into multiple roles.

Style

As striking as it is functional, the Omnino Pro looks the part and effortlessly exceeds expectations. Its Zero-bezel™ design maximises screen space and the 23.8" IPS display handles text, graphics and video faultlessly.

Versatile

The versatility of the Viglen Omnino and its large display gives you access to tomorrow's computing, today. Our fully customisable design means you can specify exactly the components you need without paying for those you don't.

Flexibility

The Omnino is based on industry standard thin mini ITX motherboards, giving the widest possible choice of processors and storage as well as integrated multimedia and connectivity. Select your preferred motherboard to optimise configuration for budget, manageability, performance or lifecycle without having to deploy different all-in-one PCs to meet your requirements.

Specification

• Chassis

Integrated form factor with 100mm VESA mounting

• Processor

Choice of Intel Core i3, i5, i7, i9 Pentium® and Celeron®

• Motherboard

Choice of Viglen thin mini-ITX boards

• Operating System

Windows® 10

• Memory

Up to 32GB DDR4

• Hard Drive

Range of m.2 SSD options

Multimedia

The Viglen Omnino takes desktop multimedia to the next level with HD video and audio built into every system and dedicated stereo speakers providing a much clearer audio image than a single internal speaker. Intel HD graphics takes care of the visuals effortlessly and accessible DisplayPort and HDMI connections mean a second display can be enabled in moments.

All models feature Gigabit Ethernet as standard with optional WiFi to keep you online, all the time.

Convenience

Every aspect of the Viglen Omnino Pro reflects feedback from our customers from the optional HD webcam to the accessible ports and controllers. The power supply is built into the chassis, so there is no inconvenient external power transformer and the option for a height-adjustable stand ensures convenient deployment on all desks.

Secure

Your IT investment is important and keeping it secure is a primary concern. The Viglen Omnino Pro includes a Kensington-style security locking point and options for a desktop locking pillar as well as XMA's flexible asset tagging and security services which mean that you can protect your investment without compromising access.

Environment

An all-in-one PC offers a highly attractive environmentally-aware computing option, because the base unit and monitor operate from a single power supply, reducing the overall power consumption. When combined with existing hardware and software power efficiency measures, the Omnino Pro becomes an exemplary environmentally-aware PC.

• Audio

Integrated multichannel HD audio

• Graphics

Integrated Intel® HD graphics

• Network

Integrated Gigabit Ethernet
802.11ac WiFi (factory-fit option)

• Optical Drive

Optional Slim DVD Writer Drive

• Input

105-key USB keyboard and optical mouse with optional upgrades

• Webcam

Optional HD webcam

• Power Supply

Internal 120 watt power supply

• Security

Standard: Kensington locking point
Optional: security pillar, asset tagging and security marking

• Display

Zero-bezel™ 23.8 inches
Native resolution: 1,920 x 1,080
Brightness: 300cd/m2
Contrast ratio: 1000:1
Response Time: 5ms

• System Dimensions (H x W x D)

440 x 540 x 65mm (215mm inc. stand)
